

GRACE CHI

Software Engineer

gracetr7@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

SKILLS

- Javascript/Node.js, Python, React/Redux, Typescript, Express.js, Flask, PostgreSQL, SQL, SQLAlchemy, HTML/CSS, jQuery, Amazon Web Services (AWS S3), Git, Docker, Object-Oriented Programming (OOP), Test-Driven Development (TDD), REST APIs, Agile Methodology, Web Development, Full-Stack Development, Recharts.js
- Playwright, Cypress, Selenium, Cucumber, Quality Assurance, Analysis, Troubleshooting, End-to-end Testing, Test Planning

EXPERIENCE

QA Engineer 2 | QA Wolf

Oct 2022 - Sept 2023

- Designed robust **Playwright** automated test plans to meet each client's expectations and deadlines.
- Collaborated with team to develop **web and mobile application testing** and troubleshoot issues.
- Executed **E2E (end-to-end)** and **regression testing** to detect potential bugs (bug tracking system: **JIRA**) prior to clients' deployments.
- Manually **triaged** and drive issues as well as escalate customer feedback.
- Maintained test data and test environments, ensuring accurate representation of production environments.
- Reported detailed steps, logs, and recordings to the development team of any defects or issues that arise during testing.
- Mentored new team members and contributed to team **documentation** on **automated testing** processes, tools, and best practices for each client.

PROJECTS

Beautsy

[site](#) | [github](#)

An e-commerce site where users can browse and purchase beauty products

- Built application with **Javascript, React, Redux, Python, Flask, SQLAlchemy, PostgreSQL, Docker, and Render**.
- Leveraged **Redux** and **React Hooks** to optimize the information management of React components, dynamically utilize the browser's **local storage** as a shopping cart, display embedded links to products and create orders seamlessly.
- Designed **user interface (UI)** and **user experience (UX)** to maximize intuitiveness, velocity, and balance between functionality and aesthetic design.
- Ensured user security and authentication with **Flask-SQLAlchemy**, Flask WTFORMs, Flask-Login, **Regular Expression**, and custom client-side form validations to avoid unnecessary **AJAX** requests which improves performance.

Sea

Robinhood-inspired application for users to experience a mock-up of the stock market

- Built application with **Javascript, React, Redux, Python, Flask, SQLAlchemy, PostgreSQL, Docker, Heroku, Recharts, and Finnhub API**.
- Integrated a **financial news application programming interface (API)** to fetch and display real-time general news and specific company news data on the frontend dashboard and stock details React components.
- Developed a comprehensive search feature that pulls results from **PostgreSQL** database allowing users to filter by keyword.
- Collaborated on a team of four engineers using **Agile methodology** and **Git version control** to execute a viable product with four features within a one week deadline.

EDUCATION

App Academy | 1000+ hour immersive full-stack web development program, 2022

The University of Texas at Austin | BSA, Nutritional Sciences, Pre-Health Professions Certificate, 2021
